Document Release Notice

This document on Corporate Environment Policy related to the Corporate Sustainability (C.S) framework is released for use in Tata Technologies Limited, India effective as per approved release date.

This document is subject to Company's document control procedure. The company withholds the right to amend, change and modify this framework with or without notice.

TATA TECHNOLOGIES LIMITED

This is a controlled document. Unauthorized access, copying and replication are prohibited.

This document must not be copied in whole or in parts by any means, without the written Authorization of the CFO, Tata Technologies Limited.

Tata Technologies Limited (TTL) is consciously committed to ensuring a sustainable, healthy, and clean environment across its facilities in different global locations. The company will address environmentally sensitive issues in a responsible manner.

TTL recognizes the impact of environment and climate change on the ecology, economy, and society, as enumerated in the Tata Group Sustainability Policy and its initiative Project Aalingana and the United Nations 17 SDG Interlinked goals.

The Company will,

- Proactively assess risks and opportunities and take business decisions to enable efficient and sustained environmental performance with a reduced carbon footprint across all its operations, by reflecting the Organizational commitment to the environment.
- Continuous improvement in the regulated & non-regulated areas. Make specific objectives & set timeframes to meet the same.
- Increase environmental consciousness amongst all its employees and stakeholders and will operate in a manner that will not affect biodiversity and animal life adversely.

To achieve the above goals, Tata Technologies will strive to:

- Comply with all local environmental laws and regulations.
- Conserve natural resources by improving operational efficiencies, reducing wastage, preventing pollution, conserving use of energy, water, and other natural resources.
- Integrate state-of-the-art technologies and best practices for continual improvement in environmental performance by implementing an Environment Management System (EMS).

Environmental Management System will cover the following as part of Its standard operating process (SOP):

- Environmental Metric covering climate change net zero carbon, energy usage and conservation, water saving and harvesting and biodiversity protection and enhancement.
- Organization Structure aligned to include environmental goals - Each function will adopt environmental evaluation criteria for its decisions and operation.
- Operational Control (Life Cycle Analysis, Pollution Prevention & Document Control)
- Employee Training to sensitize environmental issues and company commitments.
- Employee and partners and supply chain competence & awareness. (Ref Company procurement and supplier management policy)
- Continuous Evaluation the operations, processes, and policies & Improvement

This policy will be reviewed annually by CSR and Sustainability committee for its effectiveness, fulfilment of its obligations as a responsible corporate citizen and relevance with the dynamic business environment and any changes required will be recommended to the board.

The TTL Environment Policy will apply to all establishments of TTL and its employees.
